Professional Summary

Frontend Developer with 3+ years of experience creating high-performance, scalable React.js and Next.js applications. Skilled in JavaScript, TypeScript, Redux Toolkit, REST APIs, performance tuning, testing, and CI/CD. Known for boosting system efficiency, enhancing accessibility (A11y), improving load times, and crafting user-centered interfaces for platforms serving 10,000–50,000+ users. Collaborates effectively in Agile teams and applies modern engineering practices.

Core Skills

Frontend: React.js, Next.js, Redux Toolkit, React Query, Tailwind CSS, ShadCN, Material UI, Bootstrap, HTML5, CSS3, SASS, GSAP, Framer Motion, React Three Fiber, SEO, Accessibility (A11y), Responsive Design, Cross-Browser Compatibility

Backend: Node.js, Express.js, PostgreSQL, MongoDB, Firebase

Tools & DevOps: Git, GitHub, Jira, BitBucket, Postman, Docker, CI/CD, Vercel, Netlify

Programming: JavaScript (ES6+), TypeScript

Testing: Jest, React Testing Library, Integration Testing, Unit Testing

AI Tools: OpenAI, Cursor, Claude, Trae, Warp, Windsurf

Other: REST API, GraphQL, Web Performance, SDLC, Cloud Deployment, Security Best Practices

Professional Experience

Frontend Developer

Swipewire Technologies, Chennai

Jul 2025 – Present

- Engineered scalable SaaS features using React.js, React Query, and TypeScript, improving data retrieval speed by 60% and boosting application performance.
- Built high-performance UI animations with GSAP, Framer Motion, and Three.js, increasing user engagement by 30% and improving UX consistency.
- Integrated 15+ REST APIs and optimized data workflows, reducing page load time and enhancing application reliability.
- Led Agile sprint cycles, coordinated with cross-functional teams, and ensured seamless delivery through CI/CD pipelines and code reviews.

Software Developer

Gtropy, Delhi

Jan 2024 – Feb 2025

- Managed real-time IoT platforms using React.js and Node.js, serving 10,000+ users with high system uptime and improved responsiveness.
- Accelerated bug resolution by 30% through structured refactoring, and debugging.
- Collaborated with backend and product teams to enhance system scalability, API efficiency, and feature delivery.
- Reduced technical debt by 25% through code optimization, reusable component architecture, and consistent cleanup initiatives.

Software Developer

Aadrika Enterprises, Ranchi

Aug 2022 – Dec 2023

- Delivered government digital platforms supporting 50,000+ citizens with secure, scalable, and responsive interfaces.
- Guided 15 interns on React.js development, UI principles, best practices, and code quality standards.
- Strengthened security and system performance, resulting in a 20% overall efficiency improvement.
- Developed modular and reusable UI components using React.js and Redux Toolkit, reducing development time by 15%.

Major Projects

Vahan Shakti

- Designed and optimized a React.js-based fleet management platform serving 30,000+ users, improving system load time by 35%.
- Implemented RBAC, GPS tracking, and real-time monitoring features, increasing location accuracy by 25% and improving platform reliability.
- Automated workflow processes, reducing manual effort by 40% and improving operational efficiency.
- Delivered responsive and scalable UI components, enhancing performance, accessibility, and cross-browser compatibility.

Property Tax Management System

- Created dashboards and portals for 50,000+ users (JUIDCO & AMC), improving data visibility and user satisfaction.
- Implemented multilevel RBAC, secure authentication, and verification workflows, boosting operational efficiency by 30%.
- Enhanced system security using best practices, reducing security incidents by 40%.
- Redesigned UI/UX with modern frontend standards, improving user engagement by 35% and reducing friction.

Education

B.Tech in Information Technology

RTC Institute of Technology, Ranchi

CGPA: 8.23

2018 – 2022
